

Figma

Design apps and websites · Equigrow short notes

Essentials

Feature	What it does
Frame (F)	a screen or container
Auto layout (Shift+A)	stacks items with spacing, like Flexbox
Components	reusable buttons, cards; edit once, update everywhere
Variants	states of a component (default, hover, disabled)
Styles / variables	shared colours and text styles
Prototype	link frames to make clickable flows

Good practice

- Use an 8-point spacing scale and a small set of text sizes.
- Name layers clearly; keep a components page.
- Check contrast (text at least 4.5:1) and tap targets (about 44–48 px).

Shortcuts

R rectangle · T text · Ctrl/Cmd+D duplicate · Ctrl/Cmd+G group · Alt/Option drag to copy · Shift+2 zoom to selection
