

Google Colab

Free Python notebooks with GPUs · Equigrow short notes

Basics

- A notebook has **code cells** (run with Shift+Enter) and **text cells** (notes in Markdown).
- Runtime → Change runtime type → T4 GPU for deep learning (free, with limits).
- Sessions reset after idle time; save your work to Google Drive.

Handy commands

```
!pip install transformers      # install a package
from google.colab import drive
drive.mount("/content/drive")  # use files from Drive
from google.colab import files
files.upload()                 # upload from your computer
```
