

Hugging Face

Ready-made AI models and datasets · Equigrow short notes

What's there

- **Models:** thousands of pre-trained models (text, vision, audio).
- **Datasets:** ready to load.
- **Spaces:** free demo apps you can build and share.

Use a model in 3 lines

```
from transformers import pipeline
clf = pipeline("sentiment-analysis")
print(clf("I love this workshop!"))
```

Load a dataset

```
from datasets import load_dataset
ds = load_dataset("imdb")
print(ds["train"][0])
```

Tip

- Read the model card: what it was trained on, its limits and its licence.
