

Kaggle

Datasets, notebooks and competitions · Equigrow short notes

What's there

- **Datasets** to practise on · **Notebooks** with free GPUs · **Competitions** (start with Titanic) · **Learn:** free micro-courses.

How to use it

- Fork a popular notebook, run it, then change one thing and see what happens.
- Publish your own notebooks: they work as a public portfolio.
- In competitions, read the discussion tab: it's where people share what works.
