

NotebookLM

Study from your own notes and PDFs · Equigrow short notes

What it does

Upload your sources (lecture PDFs, notes, slides, links). NotebookLM answers questions using only those sources and shows where each answer came from.

How students use it

- Make a notebook per subject and add the syllabus, notes and past papers.
- Ask: summarise unit 2 · list the important formulas · make 10 exam questions with answers.
- Create study guides, FAQs or an audio overview to listen to while travelling.

Tip

- Always open the cited passage to confirm the answer before an exam.
